

DOMO PE Film 300

V 2018/12

Polyethylene Foil 0,30 mm

Description

DOMO PE Film 300, is polyethylene foil of thickness 0.30 mm used in a broad range of applications in the building industry.

Applications & Features

- Separating layer in construction applications
- Protective covering of building materials
- Damp proofing in slabs
- Environmentally friendly: material used is largely recycled polyethylene

Properties

Property	Tolerance	Value
Thickness	± 10 %	300 microns ≡ 1200 gauge ≡ 0.30 mm
Length	± 1 %	25 m
Width	± 1 %	4 m
Mass per unit area	± 10 %	300 gr/ m ²
Flexibility at low temperature	≤	(-) 20°C

IMPORTERS/ DISTRIBUTORS:

Size & Packaging

DOMO PE Film 300 is supplied in rolls 4 m x 25 m = 100 m². Each roll is folded twice so that the folded width is 1 m. Each roll is individually wrapped.

Storage

The product should be kept under cover, at temperatures between +0 °C and +45 °C. The product has no expiry date.
