

Domoproof® Fleece

Polyester-fiber fleece for reinforcing liquid resins

Description

Domoproof® Fleece is a special fabric used for the reinforcement of various liquid-applied waterproofing materials. It is made from A-quality polyester fibres and is compatible with elastomeric, bituminous and polyurethane based-products. Its lightweight and flexible nature provides effective reinforcement in liquid-applied synthetic membranes. Its use is especially beneficial useful on surfaces prone to cracking and for detailing in junctions and angles.

Technical Characteristics

PROPERTIES	VALUES	STANDARD
Mass/Unit Area [g/m ²]	60	EN 290731
Thickness [mm]	0.45	EN ISO9863-1
Softening Point [°C]	230	

IMPORTERS/ DISTRIBUTORS:

Packaging

Rolls 1 x 50 m and 1 x 10 m, individually wrapped.

Storage

The quality and the characteristics of the materials remain unaltered for a long period of time. However, it is recommended to use the product within 12 months from production date. The product must be stored in the original and unopened packaging in a dry and well-ventilated place at a temperature between + 5 °C and + 40 °C. Storage above 50 °C may lead to difficulties in removing the release liner when applying. The product is not affected by frost.
