

Technical sheet – Roof drains

The gravity roof drains are designed for draining rainwater from flat roofs, compliant to EN 1253. The upper inlet basket prevents dirt from entering. For options Vortex SVG 004, 005 and 006, the packaging contains a self-regulating heating cable with 10 W of heating output to prevent the roof inlet from freezing.

VORTEX GRAVITY ROOF DRAINS D75/D110/D125

		PART NUMBER OUTLET	PACKAGING [pcs]	WEIGHT [kg/pcs]	HEATING CABLE
Flow rate (D 75): 355 l/min Flow rate (D 110): 395 l/min Flow rate (D 125): 550 l/min
